

Questions for Response to Scientific Paper

- (1) What is the purpose of the study?
- (2) Briefly (3-4 sentences), what was the experimental design?
- (3) List the major methods / measurements taken.
- (4) Choose one Figure or Table that demonstrates the most significant results of the study. What data does this figure show and why is it significant to the study?
- (5) The authors have written conclusions for their paper. Choose one conclusion. What data did the authors present that actually supports this conclusion? Do you agree with the authors' interpretation?
