A. The most effective aspect of this course was:

The way the different assignments were broken down and distributed worked well. The summary sheets about methods were very ~~and~~ helpful as well!

B. The aspect of this course which most needs improvement is:

Ideally the assignments would have been done during the early stages of the studio project in order that the things learn could be applied - don't sure how things could be changed though to do this.

C. Other constructive suggestions:

- A. The most effective aspect of this course was:  
The topic along with the schedule. The course topic was highly relevant to our education as it responded directly to our studio work but taught us research and analysis methods that we are not able to learn in studio. The schedule also allowed for me to actually learn and RETAIN what was discussed. It was very effective and I greatly appreciated it. PWS, I didn't have to cram knowledge so I learned it.
- B. The aspect of this course which most needs improvement is:  
Nothing! wish it was longer.

C. Other constructive suggestions:

None!

Doing the tasks, specially the group projects due to the fact that my groupmates were knowledgable and respectful, so we had great disscussions.

B. The aspect of this course which most needs improvement is:

I think the lectures would need to be more personable. I did not think that the guest speakers were very helpful

C. Other constructive suggestions:

I really enjoyed this class, but it did not help too much for my searching skills on-line. I wish I could get help to find great resources online.

**A. The most effective aspect of this course was:**

Really good at using different research methods. Very engaging and a fun class. Loved the small class size as well; it felt more like a seminar course (really liked it).

**B. The aspect of this course which most needs improvement is:**

Some research tasks felt like they should be closer to the beginning of the term to match with studio a tad better. Didn't enjoy the group work too much; partner was a lazy boner.

**C. Other constructive suggestions:**

Maybe not meet at night?

The "Defining User Needs" in particular would have been more helpful towards the beginning of the semester.
